### **DETAILED ACTION**

1. This is a response to RCE filed 06/28/2006.

### **Reason for Allowable**

2. The following is an examiner's statement of reasons for allowance:

The cited art of record fails to teach a light emitting device comprising third transistor provided in said pixel for controlling an input of the video signal; and a fourth transistor provided in said pixel for setting the light emitting element in a non-emission state regardless of the video signal, wherein the light emitting element is connected in series to the first transistor and the second transistor between a first power supply and a second power supply; a gate electrode of the first transistor is connected to either a source electrode or a drain electrode of the first transistor; and the first transistor is a depletion mode transistor with a combination of all recitations as defined in independent claims 1, 6, 11, 16, 21, 26, 31, and 36.

Therefore, claims 1 to 40 are presently allowed.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Prior art of record to Koyama (US 6,753,654) discloses a light emitting device

Prior art of record to Nishitoba (US 2002/0196212) discloses a current driver circuit and image display device.

Prior art of record to Anzai (US 2002/0101394) discloses a thin film transistor for supplying power to element to be driven.

Prior art of record to Kimura (US 2003/0058687) discloses a semiconductor device.
